

NEW! Hydraulic Calibration Pump

The **NEW! Palmer PP10K Hydraulic Calibration Pump** uses a patented fully adjustable stroke control to allow for fast priming or filling of test systems. This gives the operator the ability to switch as needed to a smaller stroke for easier pumping at high pressure.

- Contoured cushion handles
- Patented protective cage around vent knob
- Priming feature
- Patented triple filtration (prevents pump failure caused by dirt)
- Non-oil based lubricant is used on all moving parts
- Built in pressure relief valve (prevents over pressurizing)
- Shatter proof reservoir
- Oversized check valves for smooth controlled operation
- 2 year warranty (even if dropped)

Specifications

0-10,000 PSI (700 Bar)

Compatible with most hydraulic fluids, oils and water

Connection (2 ports) 1/4 inch and 3/8 inch NPT/BSP

Ordering Info:

PP10K - 0-10,000 PSI Hydraulic Pump (Weight 3 lbs)

PP10K-K - Hydraulic Pump Kit includes Pump, black padded canvas case, 3 ft high pressure hose with fittings (1/4" NPT F), adaptors, 3 spare filters, and a test point.

NEW! Combo Pneumatic Calibration Pump

The **NEW! Palmer PP600 Combo Pneumatic Calibration Pump** offers the operator the ability to vent pressure or vacuum either slowly or rapidly.

- Contoured cushion handles
- Oversized check valve for smooth controlled operation
- Patented protective cage around vent knob
- Pressure and Vacuum
- Dual O-Rings on all pistons to ensure zero leakage
- 2 year warranty (even if dropped)

Specifications

Vacuum 28" Hg to Pressure 600 PSI (combination pump)

Compatible with all gauges and calibrators

Connection (2 ports) 1/4" and 1/8" NPT/BSP

Ordering Info:

PP600 - Vac-600 PSI Pneumatic Pump (Weight 2 lbs)

PP600-K - Pneumatic Pump Kit includes Pump, black padded canvas case, 2 ft non-stretch hose with fittings (1/8" NPT F/1/4" NPT F), spare rubber bonded washers, and (2) adaptors.
